

Hockey specific fixturing (Championship / Plate)

It's very common for competitions to split into *Championship* and *Plate fixtures* after an initial phase of matches. In order to regrade in these scenarios, a round must exist that is **in the future**.

PlayHQ's recommended best practice is for the preliminary round of matches to be scheduled as a regular competition. Once the fixture is completed, use the fixture upload to make a **new** round with a round date in the future. This regrade round which will be deleted after regrade has taken place.

Once this round is created, the regrading of teams, using the regrade teams button, into the various competitions can commence and the extra round will disappear as all teams have been regraded out.

Regrade teams can be done via the admin UI regardless of the method used to create the fixture (Fixture upload tool or via the Admin UI).

For more specific information, please visit the following support articles for <u>regrading</u> and <u>fixturing</u>.

Moving a round within a fixture

Fixturing and regrading work on the basis of '**round dates**' as opposed to a "game date'. Updating a round date can be done so via the fixture upload tool.

Round 1				This is the round date. Round dates are use active round and for regrading. Games are their game date.	ed to determine the grouped below by TUESDAY, MARCH 7
TUESDAY, MARCH 7					
Ness	- vs -	Dal	10:00AM Dan Arena / Dan paddo	ck	Upcoming

	active round and fo	or regrading. Games ar	TUESDAY, MARCH 7		
	their game date.				

Age and Gender Restrictions

Administrators can restrict **team lineup** selection for a game based on a defined age and gender criteria set at the grade level.

If a participant has not met the required criteria, they will be disabled from the team selection function throughout PlayHQ. Association Admins will also have the ability to exempt a player from these restrictions should they see fit. Additional information on age/gender restrictions on team lineups can be found <u>here</u>.

Clubs can manage participant **registrations** per age group and gender in a competition season. This allows clubs to:

- Instantly view participant registration numbers by gender and age group
- Avoid accepting too many registrations by setting age and gender caps on registration forms
- Open or close registrations for particular age groups.

More information on age/gender restrictions at the point of registration can be found <u>here</u>.

PlayHQ have developed a spreadsheet which allows Associations to produce a fixture summary for up to 14 teams, showing the number of times that teams have played at certain timeslots, venues, home & away (if applicable) and other teams in the grade.

Penalty Cards Best Practice

Penalty cards are best administered in PlayHQ via the Game Day Incidents Process.

Cards are located in the incidents tab under the type - Behaviour, and are categorised according to the severity of the offence.

The offences are listed as the points associated for that offence. For further a further breakdown of the offences, select the "?" next to the word "Offence". There is also a notes section in order to give a description of the incident.

Administering cards via an incident ensures that a consolidated list of cards per competition/season can be extracted via the Incidents Report, and in addition, any resulting suspensions can also be tracked via the Suspensions report.

Create a Game Incident

The **Incidents** Report generates a report of all incidents captured in PlayHQ, both game related and nongame related. The report can be filtered by organisation, competition (not relevant for non-game incidents), season and grade (not relevant for nongame incidents).

The **Suspensions** Report generates all suspensions captured in PlayHQ, against both game related and nongame related incidents. The report can be filtered by organisation, competition (not relevant for suspensions associated with nongame incidents), season and grade (not relevant for suspensions associated with non-game incidents).

If your Association only monitors the NUMBER OF CARDS given, you are able to record these via e-scoring, Game Day or My Teams (dependent on level of access you have).

You are able to produce a career statistics report at any time via the reporting function on the Administration Portal which shows, not only number and type of goals, but also number of cards

First Name	Last Name	Profile ID	Date of Birth	Gender	Last Season	Games Played	Total Goal	Field Goal	Penalty C	c Penalty St	Green Car Y	ellow Car	Red Cards
Hector	Brocklebank	80e510b1	12/12/2000	Male	Winter 2022	4					1

Mia	Wallace	a8594178	24/08/1978	Female	Winter 2022	2					1		

From here you are able to filter and sort the data to keep an accurate record of cards that have been accumulated

<u>Please note, that if you record cards under the incidents tab, this is not replicated in game day goal</u> <u>type and card type area.</u>

Injuries – the platform does not yet have an injuries feature, however the incidents and suspensions could be utilised to record any injuries, particularly those with a stand down period, such as head knocks and suspected concussion.

Whilst the only type of incident at present on the platform is "behaviour", this will not effect your ability to record injuries.

Incidents are recorded on the Game Day menu against the games that they occurred in. You then have the ability to record an outcome, including a suspension, stating the length of suspension. This will render the player ineligible to be selected in a team's starting lineup.
